

Preetam Hosamani

Bengaluru, India | work.eclipsis@gmail.com | github.com/preetamhosamani

PROFILE

Innovative and driven creator and developer with a passion for building premium, high-performance digital experiences. Strong background in crafting elegant user interfaces, open-source contribution, and rapid problem-solving through hackathons. Currently building the next generation of scalable platforms at Solus.

EXPERIENCE

Founder | Solus (2026 - Present)

- Architecting and engineering a cutting-edge platform focused on seamless user experiences and modern design aesthetics.
- Spearheading end-to-end product development, from UI/UX design to robust backend integration.

Hackathon Champion | Various Global Events (2025)

- Won multiple prestigious hackathons by rapidly prototyping and deploying AI-powered applications.
- Demonstrated expertise in building full-stack MVPs under extreme time constraints while maintaining design excellence.

Open Source Contributor | GitHub Ecosystem (2024)

- Actively contributed to widely-used frontend libraries and frameworks, improving developer experiences globally.
- Authored high-quality code, documentation, and resolved complex architectural issues within open-source communities.

KEY PROJECTS

Quantum Wall

- Engineered a secure cloud-native password manager with advanced encryption techniques.

Neural Flow

- Built an AI-powered analytics dashboard featuring real-time data visualization and anomaly detection.

CyberShield

- Developed an enterprise-grade cybersecurity monitoring platform with automated incident reporting.

MetaCanvas

- Created a real-time collaborative whiteboarding platform tailored for modern design teams.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Framer Motion

Backend: Node.js, Python, Go, Cloud Architecture (AWS)

Tools: Git, Docker, Figma, AI/ML Integrations
